

Fees

NJ Medivisits™ charges a flat fee of \$250 for a basic medical house call visit. This fee may be slightly higher if a higher level of care is needed to diagnose and treat multiple medical problems. We accept full payment at the time of service in the form of cash, money order, personal check, and all major credit cards (Visa, MasterCard, and American Express).

Our fee includes a personalized 30-45 minute visit to discuss, diagnose, and treat your condition. We will also follow up with you via telephone within 1-2 days. Please note that our fees do not include outside lab tests or x-rays; these will be billed directly by the lab or facility performing the service, we ask that you inquire with your insurance company regarding re-imburement for these services.

Insurance Companies

Although we do not directly accept health insurance plans (HMOs, Health Insurance, Medicare, or Medicaid), we will work diligently to fill out any necessary forms for you to submit to your insurance company for re-imburement purposes. We advise that you check with your individual health insurance provider to see what percentage of the fees are covered. Each individual insurance company differs from one another, and as a result we are unable to guarantee re-imburement for services. Typically insurance companies cover anywhere between 50-80% of the amount that is charged. This is usually covered through an “out of network” option for PPO or HMO plans after you have met your deductible.
